

The Display Shield®

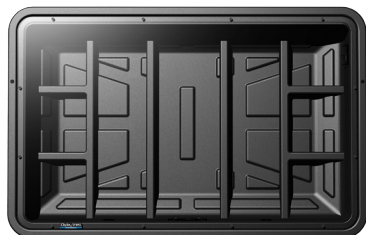

The Ultimate Indoor & Outdoor Display Protection

Horizontal Design

Enclosures for 19-60" Screens

Our universal commercial enclosures are the most cost effective solution for protecting flat panel displays and digital signage in almost any environment... indoors or out.

Theft Protection

- Security screw system keeps the enclosure tightly sealed and secure
- Polycarbonate shield is made from the same material as bullet proof glass
- Engineered to offer protection against theft, vandalism and tampering

Damage Protection

- Shatter-resistant ultra-clear Lexan® polycarbonate shield protects your investments
- Manufactured with high molecular weight polyethylene (outdoor plastics) for ultimate durability

Weather Protection

- Water-resistant sealed housing protects displays and signage in any environment
- Defends against external elements such as dust, dirt, snow, rain and moisture
- Designed with fans and ventilation system to ensure proper temperature control

Weatherproof Display Enclosures

Fits most 19-60" Displays & Screens

The Display Shield® is a tamper-resistant protective enclosure, designed and built to secure most digital displays and signage in almost any commercial environment. The Display Shield® also offers protection against weather, theft, tampering and vandalism. Developed specifically for the commercial market, The Display Shield is lightweight and comes in both vertical and horizontal models.

AFFORDABLE - Our proprietary design allows you to pair The Display Shield® with nearly any digital display and mount, instead of an expensive outdoor display, making it one of the most cost effective solutions on the commercial market.

LIGHTWEIGHT - Our units weigh 50-75% less than our competition and are made of lightweight, yet highly durable and long lasting HMWPE outdoor plastics. Our largest unit only weighs 58lbs and our smallest unit weighs 19lbs.

TAMPER-PROOF SECURITY - The security screw system keeps the weatherproof enclosure tightly sealed to provide protection against theft and or vandalism, making our enclosure the most versatile solution to guard your display investment.

DURABLE - The Display Shield's® ultra-clear Lexan® cover (shield) is manufactured using thick, shatter-resistant polycarbonate, the same material used to produce bulletproof glass, for the ultimate durability and screen protection.

ACTIVELY VENTILATED - The enclosure is actively ventilated with the included thermostatically controlled 36CFM 115V filtered fan and two vents located on the upper side corners of The Display Shield®. These features provide sufficient ventilation and prevent heat buildup to protect your display.

MADE IN THE USA - The Display Shield® enclosure was designed, engineered and is manufactured in the USA from top quality commercial grade materials.

AVAILABLE ACCESSORIES

Heaters	Outdoor Speakers
